SAYING GOODBYE TO THE GROTH CATS

By Lorilyn Shandor, Chief Executive Officer

It is not often that AWL has long-term residents who stay with us at the shelter. On average, cats come and go from the shelter in about 35 days, and dogs are moving onto their forever homes in 45 days. There are always exceptions to this. Tonka (dog) was at AWL three times from 2012 to 2022. The last time staying for 425 days before being transferred to another animal shelter and being adopted just a week later. Pudding (kitten) came in August 2022 and was with AWL for 231 days before being adopted in March of this year.

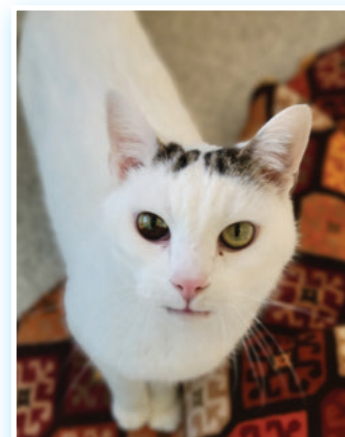

In the first half of 2023, AWL staff and volunteers lost three very special cats who had become a staple at AWL. Little Tyke, Mulligan and Grover were senior cats who spent three years living out their days in the Brenda S. Groth Senior Feline Living Community at AWL. All the original residents in the senior cat rooms were initially part of the Groth family. Little Tyke, Mulligan, and Grover were part of the first group of cats to move to AWL in 2020.

Over the months and years, Little Tyke, Mulligan and Grover won over the hearts of AWL staff and volunteers. Going from scared, feisty, and sometimes a little bit angry, to running to greet visitors for pets and of course treats! After about two years with AWL, it was apparent that between age (all three were well over 10 years old) and health concerns, the three would spend the remainder of their lives with AWL.

Between December of 2022 and June of 2023, all three beloved senior cats crossed over the rainbow bridge. Tearful staff, volunteers, and Tom Groth said their goodbye as each one's time came. Their names are often spoken in the halls of AWL. Their paw prints still grace the desks and walls of many staff offices -- reminding us how lucky we were to be caretakers for these spicy, full-of-personality cats during their last years. Thank you, Tom, for entrusting us with your feline family.

LITTLE TYKE

MULLIGAN

GROVER

VOLUNTEER SPOTLIGHT

FLO LARY

Flo began volunteering with AWL/The Menagerie six years ago after she was a regular visitor to the store and was impressed with the open and friendly staff.

We recently asked her a couple of questions to learn more:

What do you like best about volunteering at the Menagerie?

Being part of the Menagerie family and making a difference.

What would you say to someone thinking about volunteering?

Don't think about it -- just join us -- you won't regret it!

What inspires you to volunteer?

I feel I'm helping the animals.

Do you have any pets?

I have a calico cat named Angel. She showed up on my patio at five weeks old scared and injured. I nursed her back to health and now have a beautiful girl who is my joy!

Thank you, Flo, for all your time!

Interested in having your pet
Microchipped?

Please call the Shelter to schedule an appointment at (330) 539-5300

Tuesday through Saturday

Cost is \$25
(Registration included)

AN APPEAL FROM THE BOARD PRESIDENT

Dear Friends and Supporters,

Since the early days of the COVID crisis, we've been inundated by a remarkable number of animals that have come into our care. Starting in March of 2020, we've taken in over 1,726 dogs, 2,434 cats and several other species like 16 rabbits, 25 guinea pigs, 223 farm animals and the like. If you can think of any type of domestic animal, chances are many have passed through our doors in the last few years. And there seems to be no slow down.

What's caused this? Frankly, it's a dramatic increase in the commitment we've made in answering, investigating and removing animals from inhumane conditions. Our team of three humane officers work tirelessly each day. They are truly special. They go into homes not fit for man nor beast. Often finding dead or dying cats, dogs and other pets mired in unthinkable conditions. Read the newspaper, follow local television and social media posts and you'll see the outcome of their investigations.

As a result, 51% of our intakes are now directly tied to the care of these "humane case" animals. Many of these animals require additional medical care before they can be released into our internal population, and then often require additional time and TLC before they can be adopted. As you can imagine, the costs are significant and are further compounded by the legal expenses involved in prosecuting the offenders.

That's where my request for your help comes in. We need your financial support. Pure and simple. We receive no funds—zero, zip, zilch—from any source other than compassionate donors like you.

The really good news is that your support will have an immediate and positive effect. We will be able to continue to promptly answer the almost constant need to investigate humane cases, rescue animals from miserable conditions, provide medical care, save lives and, ultimately help get these animals to the loving homes they deserve.

That's a lot of bang for the buck. I hope you agree and will donate accordingly. We offer a number of quick and easy ways to donate: phone us at 330-539-5300; an addressed envelope is included in the back of this newsletter that you can mail to us; and we also now accept Venmo (@awltrumbullOH). To keep up to date, join us on Facebook or Instagram at @awltrumbull or on the web at AWLRescueMe.com. For long-range options, consider us in your estate planning.

Thank you. The animals of Trumbull County are counting on you.

Sincerely,
Robert Hotchkiss
President, AWL Board of Directors

5 LONGEST CANINE RESIDENTS

Meet Nakia!

Intake 9/9/22
Nakia is a 6-year-old spayed female. She is currently testing heartworm positive but is still very happy and playful. Nakia would be best in a family with older children. She does well with other dogs but needs to keep playtime to a minimum for the time being.

Meet Mira!

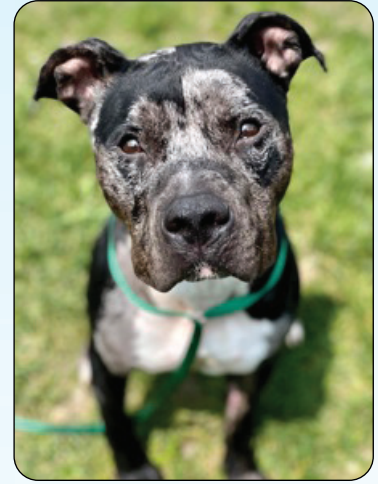

Intake 9/27/22
Mira is a 2-year-old spayed female. She is energetic and playful. She does like certain dogs and would most likely do best with in a home with older children. She loves long walks in the park.

Meet Tia!

Intake 2/3/23
Tia is a 2-year-old spayed female. She would need to be the only pet in the household. She is extremely friendly and outgoing! She loves playing fetch and would really enjoy a big yard to run around!

Meet Dior!

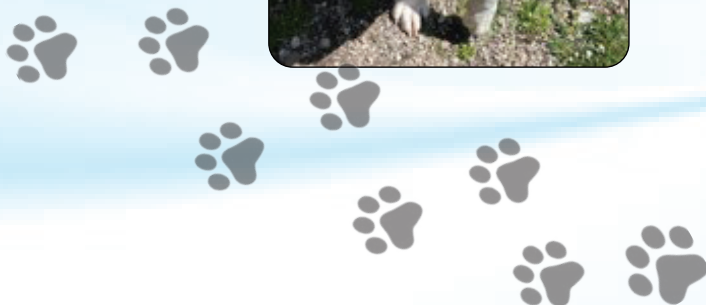

Intake 3/8/23
Dior is a one-and-a-half-year-old neutered male. He gets along well with other dogs but is not recommended to be around cats or children due to his high energy level. Dior was part of the Caring Companions Prison Training Program

Meet Kane!

Intake 3/16/23
Kane is a 5-and-a-half-year-old neutered male. He recently completed his heartworm treatment and is ready for his forever home! He has an average energy level and will do well with children.

5 LONGEST FELINE RESIDENTS

Meet Luna!

Intake 4/9/22
Luna is a 2-year-old spayed female cat. Luna is timid and it can take awhile to gain her trust. She needs a person who will be patient while she adjusts to her new environment. She would also do best in a quiet home that has one or more other cats.

Meet Nora!

Intake 10/7/22
Nora is a 3-year-old spayed female. She would do very well in a home with other cats. She would also be fine around older children but no smaller kids. Nora is extremely laid back and really enjoys being petted.

Meet Dolly!

Intake 2/10/23
Dolly is a 2-year-old spayed female. She is very laid back and quiet, but very affectionate and super sweet. She would do well with other cats and older children, but not smaller kids.

Meet Hippo!

Intake 1/13/23
Hippo is a 6-year-old neutered male. He is very fiendly and social and gets along with other cats. He can be a bit shy when meeting new people but warms up quickly! Hippo was adopted from AWL as a kitten in 2017 and returned to the shelter in 2023 after being found as a stray.

Meet Petunia!

Intake 2/10/22
Petunia is a spayed female, 1-year-old. She came to AWL through the humane department. She is very shy and requires a patient adopter. Petunia would do best in a quiet environment, although she does enjoy being petted by the people who she trusts. She gets along with other cats but would not be a good fit with dogs.

Trap, Neuter, Return (TNR) is solution to cat overpopulation problem

By Catena Core

TNR stands for Trap, Neuter, Return. Outdoor “community cats” are trapped, taken to a clinic to be spayed or neutered (surgical procedure where an animal is sterilized so it cannot reproduce), vaccinated for rabies, and released back to where it was found. “Community cats” refers to both stray (abandoned/lost, socialized) and adult feral cats (untamed) living outside.

It’s true that outdoor cats have a higher likelihood to face problems that indoor cats don’t. However, community cats have learned to live outside and fend for themselves. They can still live long, healthy lives.

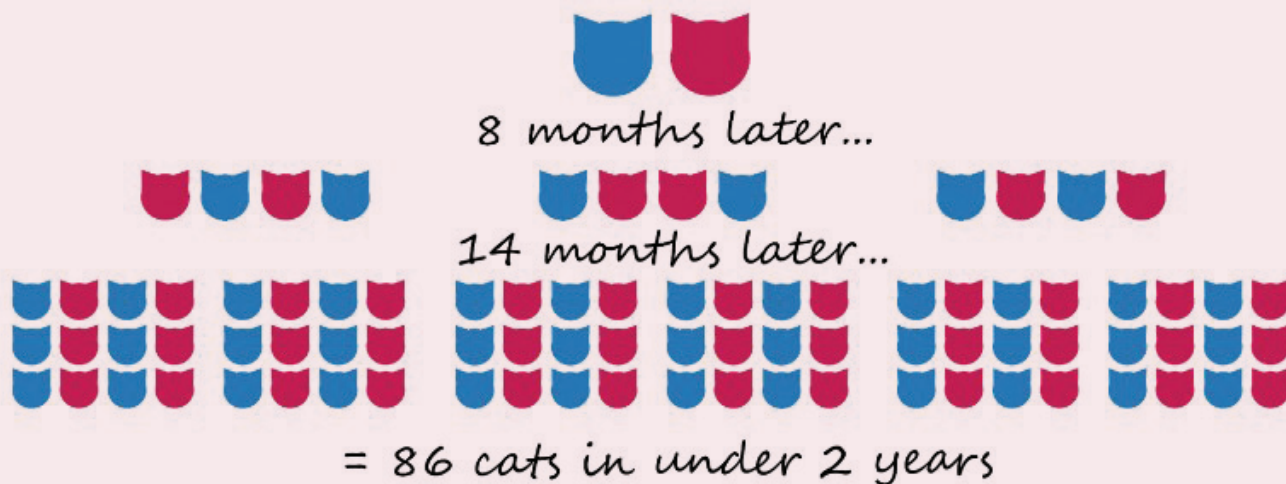

It would be ideal for all cats to be born with the opportunity to be placed in a home and loved by suitable caretakers. But since we’re already in a position where community cats exist, what can we do to work toward this vision? The answer is spay/neuter, and educate others about the importance of TNR.

TNR IS THE SOLUTION

Cats reproduce rapidly starting at just 6 months old! They’ll mate with any male cat and usually have between 2-3 litters of kittens each year with approx. 4-6 kittens per litter. That’s 18 new kittens that will also start reproducing in just 6 months! Female cats can continue to reproduce their entire lives.

There are likely hundreds of thousands of community cats in Trumbull County, and millions state-wide. TNR addresses many problems related to the community cat overpopulation problem:

- **Animal Shelter Capacity** - Shelters reach capacity because unsterilized community cats reproduce rapidly. Approximately 80% of kittens surrendered to shelters are birthed by community cats. When community cats are fixed, shelters can free up resources to help other animals.
- **Nuisance Behaviors** - Unsterilized cats wander, spray to mark their territory, and fight and yowl at night. Fixing them tends to reduce or eliminate these issues.
- **The Unethical Alternative** - TNR is an ethical (and effective) solution to alternative methods of addressing overpopulation. Unfortunately, there are still people who shoot, poison, or otherwise kill cats, which is illegal, unethical, and ineffective. There’s also trap-kill efforts where community cats are mass-euthanized. But neither of these methods fix the overpopulation problem, because of something called the vacuum effect.
- **The Vacuum Effect** - Research shows that when community cats are removed from a neighborhood, this opens up resources for new cats to move in. Unsterilized newcomers will produce larger litters with a higher survival rate because there are resources available to sustain this. TNR is the solution because returned cats will continue to utilize the available resources without making more cats! It’s very important to return cats to the area they’re familiar with and gives them a higher chance for survival.

TNR studies show it eliminates new cats from being born in an area in a few years, and decreases the population substantially (20-60%) in under 10 years.

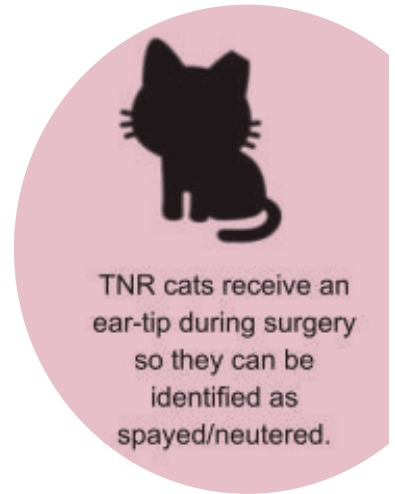

Reach out to any of the following clinics to learn costs and clinic-specific TNR procedures:

- AlterClinic (Canton, 234.804.3064)
- Rascal Unit (Traveling clinic, 614.389.3500)
- Tails of Hope (Hermitage, 724.346.4673)
- One of a Kind Pets (Akron, 330.865.6890)
- Beaver County Humane Society (Aliquippa, 724.775.5801)

Both male and female community cats need to be sterilized. Any cat without an ear tip that doesn't belong to anyone in the neighborhood should be trapped and taken to a TNR clinic.

What seems like a small dent actually makes a huge difference!

If everyone felt it wasn't their responsibility to TNR, imagine how many more cats would be running around! Anyone can contribute to TNR efforts. If you find you can't directly TNR, either educate others about the importance of spay/neuter and TNR, or find an organization doing it and support them.

For comprehensive TNR instructions, visit: <https://tailsofhopewpa.org/forms-%2F-flyers>

EMPLOYEE SPOTLIGHT

CHELE FAULKNER

Humane Officer

We are proud to introduce you to Chele Faulkner, one of three humane officers at AWL. Chele began working at the organization in July 2019. She said ever since she was a little girl, she knew she wanted to be a humane law enforcement officer, and after keeping an eye out for a job opportunity, she was lucky to be hired at AWL!

Let's get to know Chele a little better:

What do you like most about the work you do here?

AWL has provided me an opportunity to be able to make an impact. I have worked in the animal field for over ten years and I have always wanted to be the one out in the field responding to reports of animal cruelty and neglect that come in. What I like most about the work I do here getting to fulfill my sense of purpose.

*Proud to have you as
part of our team, Chele!*

Do you have any pets / how many came from AWL?

I have one cat. She is an 11-year-old black domestic shorthair and her name is Zucchini. I adopted her from AWL about two years ago. She came from a hoarding case that our department handled.

What is the toughest challenge of your job here at AWL?

One of the toughest challenges of my job is seeing all the abuse and neglect firsthand. It can be difficult to walk into some of the situations and witness what the animals have been subjected to.

What is your proudest moment at AWL?

I'm not sure I have just one. I am so proud of my team and all the work we have done and all the animal's life we have changed. The department has grown a lot since I started four years ago. I have learned so much and I know I would not have been able to accomplish what I have without everyone on the team

What advise would you offer to a new agent?

There is great value in providing resources and education to the community. There are a lot of people that don't know or realize that there are resources to help people care for their animals and one of the largest parts of our job is to educate the owners to help them do better.

If you were an animal, what would you be and why?

Some kind of bird, probably. Maybe an eagle or a pelican so I could just fly around and eat fish all day.

TRIBUTES (IN MEMORY OF)

January 2023 – June 2023

Tributes to a loved one or a friend say something special about them. The AWL is always deeply honored to be named by someone as their charity of choice. And, when tribute gifts are given, the families also receive a feeling of how much that person mattered. A legacy of caring is one that we all take pride in and can feel good about. Tribute gifts are so important to providing the operations and services of the AWL. So, to those special people, we take a moment to remember them and say thank you for caring. May the wonderful memories of each individual live on in our hearts and in the lives of the many pets they have helped.

Thank You!

IN MEMORY (BELOVED PETS)

January 2023 – June 2023

Pets teach us to love unconditionally, to be kind and to be fully present in the moment. When we experience the loss of a beloved pet, our hearts are broken, but we take comfort in knowing that our lives were touched by their love and companionship. Pet tributes are vital to the operations and services of the AWL and there are so many pets that need help. Thank you for your gifts in memory of these special pets and in giving to the AWL to better the lives of our shelter pets.
